

I would like the no call list to be more restrictive not less. I do not want to be contacted and asked to purchase something-if I am interested in a product I will initiate the contact. I do not like being bothered by telemarketers or for that matter the local departments all asking for \$\$\$. When I give it is because I want to not because someone is calling and begging me to. I feel this invades my privacy in my home/cell phone. Do not open the no call list up. This would just invite more and more to challenge the no call list and since it has been enacted, we have enjoyed more peace with our family. Thank you for your time.
